Information Technology Student Organization (ITSO) | ESSU Guiuan

- Maintained organizational records, meeting minutes, and communication logs.
 - Ensured accurate documentation for a student organization of 500+ members and continuity of information during leadership transitions.
 - Supported organizational planning, coordination, and communication activities
-

Projects

Digital Discovery for Elderly People - Capstone Project 2025 - 2026

PHP, MySQL, HTML, CSS, Hosted in Netlify

Developed an educational web platform designed to improve digital literacy among the elders through interactive simulations, step-by-step tutorials, and online safety awareness materials.

BorrowSmart - On-the-Job Training Project 2025 - 2026

Javascript, HTML, CSS, Google Appscript, Google Sheet, Github, Firebase Auth

Developed a QR-based asset management system that tracks the borrowing and return of office equipment, tools, and keys. Features include borrower tracking, return verification, and photo-proof submission.

CWTS Attendance Management System (RFID)

Javascript, HTML, CSS, Google Appscript, Google Sheet, Github, RFID

Developed an RFID-based attendance management system to automate attendance tracking for class/training sessions.

MINED – Personal Productivity System

Javascript, HTML, CSS, Firebase, Hosted in Netlify

Developing a personalized productivity platform featuring habit tracking, analytics, AI-assisted conversations, scheduling, and personal development monitoring.

BEH – Personal AI Application

Javascript, HTML, CSS, Firebase, Hosted in Netlify

Building an AI-powered assistant that provides personalized guidance, profile-based responses, and daily life support.

My Homies – Group Social Platform

Javascript, HTML, CSS, Firebase, Hosted in Netlify

Developing a group application that combines social interaction, gamification, streaks, and mission-based activities for community engagement.
